COMMISSIONER OF PATENTS AND TRADEMARKS  
Washington, D.C. 20231

SIXTH SUPPLEMENTAL REISSUE DECLARATION

I, Kazumi SAKUMOTO, hereby declare:

1. That this sixth supplemental reissue declaration is being made to supplement my earlier declarations which comprise part of Reissue Patent Application Serial No. 08/493,979.

2. That I verily believe the original patent to be wholly or partly inoperative or invalid by reason of claiming less than I had a right to claim in the original patent because original independent patent claims 1-4:

(a) do not cover a method of displaying a paging message on an analog display having a movable indicating member, the method comprising the steps of receiving a paging

message and moving the indicating member to a predetermined location to indicate information concerning the received paging message; and

(b) do not cover a method as set forth above in paragraph 2(a) and further that the step of moving the indicating member comprises the steps of determining the content of the paging message and moving the indicating member to a predetermined location depending upon the content of the message.

3. To correct this error in claiming less than I had a right to claim, new independent claim 22 and dependent claim 27 have been added as follows:

(a) Independent claim 22 is directed to a method of displaying a paging message on an analog display having a movable indicating member, the method comprising the steps of receiving a paging message and moving the indicating member to a predetermined location to indicate information concerning the received paging message.

(b) Claim 27 depends on and contains all of the limitations of claim 22 and includes the additional limitation that the step of moving the indicating member comprises the steps of determining the content of the paging message and moving the indicating member to a predetermined location depending upon the content of the message.

4. That I verily believe the original patent to be wholly or partly inoperative or invalid by reason of claiming less than I had a right to claim in the original patent because original independent patent claims 1-4:

(a) do not cover a method of displaying a paging message on an analog display of a timepiece having a movable time-indicating member, the method comprising the steps of receiving a paging message and moving the time-indicating member to a predetermined location to indicate information concerning the received paging message;

(b) do not cover a method as set forth above in paragraph 4(a) and further that the step of moving the time-indicating member comprises the steps of determining the content of the paging message and moving the time-indicating member to a predetermined location depending upon the content of the message;

(c) do not cover a method as set forth above in paragraph 4(a) and further that the timepiece comprises a watch; and

(d) do not cover a method as set forth above in paragraph 4(c) and further that the step of moving the time-indicating member comprises the steps of determining the content of the paging message and moving the time-indicating member to a predetermined location depending upon the content of the message.

5. To correct this error in claiming less than I had a right to claim, new independent claim 23 and dependent claims 24-26 have been added as follows:

(a) Independent claim 23 is directed to a method of displaying a paging message on an analog display of a timepiece having a movable time-indicating member, the method comprising the steps of receiving a paging message and moving the time-indicating member to a predetermined location to indicate information concerning the received paging message.

(b) Claim 24 depends on and contains all of the limitations of claim 23 and includes the additional limitation that the step of moving the time-indicating member comprises the steps of determining the content of the paging message and moving the time-indicating member to a predetermined location depending upon the content of the message.

(c) Claim 25 depends on and contains all of the limitations of claim 23 and includes the additional limitation that the timepiece comprises a watch.

(d) Claim 26 depends on and contains all of the limitations of claim 25 and includes the additional limitation that the step of moving the time-indicating member comprises the steps of determining the content of the paging message and moving the time-indicating member to a predetermined location depending upon the content of the message.

6. That I verily believe the original patent to be wholly or partly inoperative or invalid by reason of claiming less than I had a right to claim in the original patent because original independent patent claims 1-4:

(a) do not cover a method of displaying a paging message using a timepiece having an analog display having an indicating member movable to a desired position to indicate time, the method comprising the steps of receiving a paging message and moving the indicating member to a predetermined location to indicate information concerning the received paging message;

(b) do not cover a method as set forth above in paragraph 6(a) and further that the indicating member comprises an indicating hand of the timepiece;

(c) do not cover a method as set forth above in paragraph 6(b) and further that the step of moving the indicating hand comprises the steps of determining the content of the paging message and moving the indicating hand to a predetermined location depending upon the content of the message;

(d) do not cover a method as set forth above in paragraph 6(b) and further that the timepiece comprises a watch;

(e) do not cover a method as set forth above in paragraph 6(d) and further that the indicating hand comprises the steps of determining the content of the paging message and moving the indicating hand to a predetermined location depending upon the content of the message; and

(f) do not cover a method as set forth above in paragraph 6(a) and further that the step of moving the indicating member comprises the steps of determining the content of the paging message and moving the indicating member to a predetermined location depending upon the content of the message.

7. To correct this error in claiming less than I had a right to claim, new independent claim 28 and dependent claims 29-33 have been added as follows:

(a) Independent claim 28 is directed to a method of displaying a paging message using a timepiece having an analog display having an indicating member movable to a desired position to indicate time, the method comprising the steps of receiving a paging message and moving the indicating member to a predetermined location to indicate information concerning the received paging message.

(b) Claim 29 depends on and contains all of the limitations of independent claim 28 and includes the additional limitation that the indicating member comprises an indicating hand of the timepiece.

(c) Claim 30 depends on and contains all of the limitations of claim 29 and includes the additional limitation that the step of moving the indicating hand comprises the steps of determining the content of the paging message and moving the indicating hand to a predetermined location depending upon the content of the message.

(d) Claim 31 depends on and contains all of the limitations of claim 29 and includes the additional limitation that the timepiece comprises a watch.

(e) Claim 32 depends on and contains all of the limitations of claim 31 and includes the additional limitation that the indicating hand comprises the steps of determining the content of the paging message and moving the indicating hand to a predetermined location depending upon the content of the message.

(f) Claim 33 depends on and contains all of the limitations of claim 28 and includes the additional limitation that the step of moving the indicating member comprises the steps of determining the content of the paging message and moving the indicating member to a predetermined location depending upon the content of the message.

8. That I verily believe the original patent to be wholly or partly inoperative or invalid by reason of claiming less than I had a right to claim in the original patent because original independent patent claims 1-4:

(a) do not cover a device for displaying a paging message, the device comprising a paging receiver for receiving a paging message, an indicating member movable to a desired position to indicate time, and moving means for moving the indicating member to a predetermined position in response to the receipt of a paging message to indicate information concerning the received paging message; and

(b) do not cover a device as set forth above for paragraph 8(a) and further comprising means responsive to the content of the paging message for controlling the moving means to move the indicating member to a predetermined position depending upon the content of the paging message.

9. To correct this error in claiming less than I had a right to claim, new independent claim 34 and dependent claim 35 have been added as follows:

(a) Independent claim 34 is directed to a device for displaying a paging message, the device comprising a paging receiver for receiving a paging message, an indicating member movable to a desired position to indicate time, and moving means for moving the indicating member to a predetermined position in response to the receipt of a paging message to indicate information concerning the received paging message.

(b) Claims 35 depends on and contains all of the limitations of independent claim 34 and includes the

additional limitation that the device further comprises means responsive to the content of the paging message for controlling the moving means to move the indicating member to a predetermined position depending upon the content of the paging message.

10. That all errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intention on my part.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that any willful false statements or the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this application or any patent resulting therefrom.

Dated: August 21, 2001
